UCSF OB/GYN & RS 2022 – 2023 Residency Program Applicant Information

You were once wild here.. Don't let them tame you. - Isadora Duncan

OUR STATEMENT OF VALUES

The UCSF Residency Program in Obstetrics and Gynecology commits to understanding how histories of oppression, exploitation, and mistreatment of Black and Indigenous communities and other historically excluded communities led to the creation of our specialty and contribute to current inequities in reproductive health and gynecology. We honor the legacies of Lucy, Anarcha, and Betsey in our commitment to reproductive justice, equity, and human rights in our healthcare delivery, research, and education. We are invested in ensuring that all individuals have access to language and race concordant health care as well as to comprehensive reproductive and sexual healthcare, including abortion, contraception, surgery, fertility services, and preventive care. We take immense pride in serving women, and we celebrate the opportunity to care for patients of all gender identities, regardless of sex assigned at birth.

We vow to advocate around issues that affect our patients and their autonomy and for services that maximize the ability of individuals and communities to experience well-being. More so, we refuse to shy away from courageous conversations and advocacy as we know that the care we provide will only be transformed by unrelenting activism, community engagement, and systemic change. We pledge to deliver high-quality, evidence-based health care to all patients, to practice with true collaboration with other health workers, disciplines, and community-based organizations, and to provide a safe, inclusive learning environment for trainees of diverse backgrounds and learning styles. As a residency program based at a public institution, we strive to align our training to the larger societal needs and to prepare OBGYN physicians for careers of service. In our pursuit of clinical excellence, equity and justice, and transformative practice, we pledge to hold ourselves and those around us accountable.

MISSION STATEMENT

The Obstetrics and Gynecology Residency Program at the University of California, San Francisco trains physician leaders and advocates who provide innovative, compassionate, and exemplary comprehensive health care by:

•Centering health equity, anti-racism, and anti-oppression in clinical care and in education, particularly for Black and Indigenous individuals, people of color, trans and nonbinary individuals, and immigrant populations;

• Caring for individuals, families, and communities within a variety of settings, leveraging inherent strengths of the community and demonstrating cultural humility;

• Applying scientific evidence within a person-centered framework to deliver dignified and just sexual and reproductive health care;

•Fostering interprofessional and multidisciplinary collaboration and building a diverse workforce, inclusive of historically and contemporaneously excluded communities; and

•Inspiring and preparing thought leaders, researchers, and advocates to transform the practice of obstetrics and gynecology locally, nationally, and internationally.

ZUCKERBERG SAN FRANCISCO GENERAL HOSPITAL

Our mission is to promote justice, quality and equity in women's health care. We seek to eliminate barriers to good health for women in San Francisco and around the world. We believe this objective is best achieved by providing exemplary patient care to all women, especially those who are poor and vulnerable; training and inspiring the next generation of reproductive health leaders; and improving policy and practice through research and scholarship.

REPRODUCTIVE JUSTICE

"Reproductive Justice is the complete physical, mental, spiritual, political, social, and economic well-being of women and girls, based on the full achievement and protection of women's human rights. This definition as outlined by Asian Communities for Reproductive Justice (ACRJ) offers a new perspective on reproductive issues advocacy, pointing out that for Indigenous women and women of color it is important to fight equally for (1) the right to have a child; (2) the right not to have a child; and (3) the right to parent the children we have, as well as to control our birthing options, such as midwifery. We also fight for the necessary enabling conditions to realize these rights....

The Reproductive Justice framework analyzes how the ability of any woman to determine her own reproductive destiny is linked directly to the conditions in her community—and these conditions are not just a matter of individual choice and access. Reproductive Justice addresses the social reality of inequality, specifically, the inequality of opportunities that we have to control our reproductive destiny. Moving beyond a demand for privacy and respect for individual decision making to include the social supports necessary for our individual decisions to be optimally realized, this framework also includes obligations from our government for protecting women's human rights. Our options for making choices have to be safe, affordable and accessible, three minimal cornerstones of government support for all individual life decisions." - Loretta Ross, <u>SisterSong</u> Women of Color Reproductive Health Collective. <u>Reproductive Justice Briefing</u> <u>Book</u>: A Primer on Reproductive Justice and Social Change

ADMINISTRATION

We are proud to help train incredible, talented, and motivated individuals who will make a difference in this world. We are looking for applicants who bring enthusiasm and innovation, and for those with diverse identities, experiences, and background, including and centering those from historically and contemporaneously excluded communities. Through rotations at our academic hospital, our safety net hospitals, and community-based settings, our trainees gain excellent experience in family planning, minimally invasive GYN surgery, gynecologic oncology, physiologic birth, and complex obstetrics including operative vaginal delivery. We are the #1 NIH-funded women's health program in the country and over half of our graduating residents enter further training including the traditional OBGYN fellowships as well as Minimally Invasive Surgery, Addiction Medicine, Global Health, Palliative Care, and research fellowships. We strive to train residents who will serve the workforce needs of our state and country and who will provide exemplary, patient-centered care to all patients including the most marginalized. We are fortunate to have a diverse group of residents who enrich our department, augment the educational experience of our trainees, and enhance the care we provide our patients. We are strongly committed to evidence-based medicine, health equity, comprehensive reproductive health, including abortion and contraception, interprofessional work, and care for the underserved. These values are part of the air that we breathe and permeate our clinical care, research, education, quality improvement, and advocacy work. We look forward to meeting you and introducing you to our fabulous program.

ADMINISTRATION

Organizational Chart – Graduate Medical Education Department of Obstetrics, Gynecology and Reproductive Sciences

EQUITY & INCLUSION

"It is not enough to acknowledge your privilege. Acknowledging it will never make it better, will never, ever change anything. At some point, you must act against it. This is that point." <u>Mia McKenzie</u>

"I know there is strength in the differences between us. I know there is comfort, where we overlap." – ani difranco

EQUITY & INCLUSION

"The opposite of racist isn't 'not racist.' It is 'anti-racist.' What's the difference? One endorses either the idea of a racial hierarchy as a racist, or racial equality as an anti-racist. One either believes problems are rooted in groups of people, as a racist, or locates the roots of problems in power and policies, as an anti-racist. One either allows racial inequities to persevere, as a racist, or confronts racial inequities, as an anti-racist. There is no in-between safe space of 'not racist."

<u>Ibram X. Kendi</u>, How to Be an Antiracist

ANTI-RACISM

COMMITMENT

<u>The University of California – San Francisco OBGYN</u> <u>Residency Anti-Racism Commitment</u>

We the residents that make up the University of California, San Francisco (UCSF) Obstetrics, Gynecology, & Reproductive Sciences program, unequivocally denounce the deaths of Ahmaud Arbery, Breonna Taylor, George Floyd, Tony McDade and the countless lives lost at the hands of white supremacy and police brutality. We acknowledge that racism is a public health pandemic. Thus, we solemnly pledge to use our individual and collective voices to speak out and work against it. We pledge that our actions will purposefully and intentionally advance anti-racist efforts. We pledge to continue educating ourselves both individually and collectively on anti-racism and the tangible ways we can effectively contribute to the dismantling of systemic racism and anti-Blackness.

To our colleagues who identify as Black, Indigenous, People of Color

We see you, we acknowledge the additional pain you must carry, and we support you. We pledge to make our department a place of belonging to those of all ethnicities, backgrounds, and experiences. We are committed to supporting our Black, Indigenous, and People of Color colleagues as they seek to advance their careers and obtain leadership positions. We are committed to challenging the norms that have long prevented this advancement and to elevating the Black, Indigenous, and People of Color voices within our department.

ANTI-RACISM

COMMITMENT

<u>The University of California – San Francisco OBGYN Residency Anti-</u> <u>Racism Commitment (cont'd)</u>

To our learners who identify as Black, Indigenous, People of Color

We see you, we acknowledge the additional pain you must carry, and we support you. We commit to making our spaces ones of welcoming, where you feel supported and mentored in your learning and growth both personally and professionally. We acknowledge that this will require constant feedback, and growth. We commit to being open to this feedback and pushing our colleagues, attending physicians, and administrators for continued growth. We commit to acknowledging our own conscious and unconscious biases, and speaking out when we see those biases perpetrated against you. We commit to holding every member of our department transparently accountable to anti-racist standards.

To our patients who identify as Black, Indigenous, People of Color

We see you, we acknowledge the additional pain and allostatic load you must carry, and we support you. We acknowledge and name the longstanding history of racism, anti-Blackness, and violence that has likely impacted your health and the health of your family. We also acknowledge the racial injustices and economic exploitation that have resulted in the health disparities we see today. These disparities have led to the ongoing high rate of morbidity and mortality associated with childbirth as it pertains to Black, Indigenous, and People of Color birthing people. We commit to making UCSF a place where you can seek and receive unbiased, anti-racist care from providers who are dedicated to hearing you and prioritizing reproductive justice in all aspects of the care we provide. We commit to continuing to evaluate the structural, institutional, and individual actions that perpetuate these disparities and work to actively dismantle them.

VALUES

Caring For Vulnerable Populations

Consistent with our values as a department and residency, we are proud to offer the EMPOWUR curriculum. We believe strongly in training physicians who are able to care for the vulnerable in this country and who aspire to be leaders in providing care for underserved populations.

EMPOWUR: <u>E</u>ducating, <u>M</u>entoring, and <u>P</u>reparing <u>O</u>B/GYNs to care for <u>W</u>omen in <u>U</u>nder-<u>R</u>esourced communities

Program Vision: The vision of the EMPOWUR program is that graduates will be physician leaders who improve the health of underserved communities and who eradicate health disparities that disproportionately affect underserved populations. *Curriculum Pillars:* The four curricular pillars of EMPOWUR are clinical excellence, care for vulnerable populations, community engagement, and leadership.

Didactics

- Wednesday didactic lectures at ZSFG: highlighting histories and approaches to caring for specific vulnerable populations (previous lectures given "Sterilization and incarcerated women" and "Caring for Homeless Women/Patients")

- Structured presentations available electronically in regards to care of underserved women and of refugee/immigrant women.
- Sponsored participation in the UCSF Medical Care of Vulnerable and Underserved Populations course

- Involvement in STEP-UP (Zuckerberg San Francisco General Hospital Training and Education Programs for Underserved Populations). STEP-UP is a cross-residency effort to align the different programs at ZSFG focused on improving training in care for vulnerable populations. Membership within the STEP-UP taskforce has increased the resources and training experiences available to ObGyn residents, providing greater structured and mentored experiences in caring for vulnerable populations. Additionally, participants in STEP-UP will be eligible for a certificate in health equity, a distinction that demonstrates expertise and leadership in caring for underserved populations.

This work has been generously supported by the UCSF Department of Obstetrics, Gynecology, and Reproductive Sciences, the UCSF OBGYN Residency Program, the ZSFG Division, and the Song-Brown program. Song-Brown program provides funding to California education programs with the goals to increase the number of under-represented minority practitioners, to provide clinical training and education in underserved areas, and to increase access to healthcare to the state's underserved population.

UCSF's Commitment To Training In Family Planning

VALUES

The UCSF OB/GYN Residency Program is THE preeminent Family Planning Residency Program in the country.

What does that mean to prospective applicants?

We recognize that medical students and residents bring a colorful, diverse and at times complex set of experiences and cultural circumstances to the table.

UCSF proudly and unabashedly advocates for reproductive justice and women's access to reproductive healthcare locally, nationally and internationally. It is our expectation (in alignment with nationally mandated training guidelines) that each and every resident, upon completion of their program of studies:

- will be able to conduct supportive and unbiased, client-centered pregnancy options counseling.
- will be able to care for women presenting with abortion-related complications
- will be proficient in the discussion and prescription of all forms of contraception.

As a program, we pride ourselves on our efforts to create and maintain the program diversity that enhances the educational experiences of all those involved. We welcome all perspectives and points of view, which we believe maximizes opportunities for personal and professional growth. Most importantly, this philosophy is based in prioritizing the needs of the women of the communities we serve and creating physician leaders committed to their care.

CONSTITUTION OF THE WORLD HEALTH ORGANIZATION

VALUES

THE STATES Parties to this Constitution declare, in conformity with the Charter of the United Nations, that the following principles are basic to the happiness, harmonious relations and security of all peoples:

- Health is a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity.
- The enjoyment of the highest attainable standard of health is one of the fundamental rights of every human being without distinction of race, religion, political belief, economic or social condition.
- The health of all peoples is fundamental to the attainment of peace and security and is dependent upon the fullest co-operation of individuals and States.
- The achievement of any State in the promotion and protection of health is of value to all.
- Unequal development in different countries in the promotion of health and control of disease, especially communicable disease, is a common danger.
- Healthy development of the child is of basic importance; the ability to live harmoniously in a changing total environment is essential to such development.
- The extension to all peoples of the benefits of medical, psychological and related knowledge is essential to the fullest attainment of health.
- Informed opinion and active co-operation on the part of the public are of the utmost importance in the improvement of the health of the people.
- Governments have a responsibility for the health of their peoples which can be fulfilled only by the provision of adequate health and social measures.

EDUCATION AND TRAINING

"It is the mark of an educated mind to be able to entertain a thought without accepting it. " - Aristotle

EDUCATION & TRAINING

"Education either functions as an instrument which is used to facilitate integration of the younger generation into the logic of the present system and bring about conformity or it becomes the practice of freedom, the means by which men and women deal critically and creatively with reality and discover how to participate in the transformation of their world."

> - Paulo Freire, "Pedagogy of the Oppressed"

APPLICATION PROCESS

APPLICATION PROCESS

The University of California, San Francisco Department of Obstetrics, Gynecology and Reproductive Sciences (UCSF OBGYN/RS) accepts applications through ERAS, the Electronic Application. The only documentation reviewed for consideration is that submitted through ERAS.

Please note:

In line with national recommendations and for the safety of all, our interviews this year will all be conducted virtually

2223 MATCH AND APPLICATION REVIEW

We will begin reviewing applications on September 28, 2022. We review applications when they contain at least the following:

- MyERAS common application
- Personal statement
- CV (generated through ERAS)
- USMLE Step I
- Medical school transcripts
- 1 letter of recommendation, preferably from an ObGyn (3 letters total by October 1)

NOTE: When listing publications, please make sure to include the PMID number.

IMPORTANT DATES:

- September 28:
 - Application review begins.
- Mid October 2022 (final date TBD) Interview Invitations extended.

TIP FOR SUCCESS:

We communicate with applicants through ERAS, therefore, do not wait until your application is complete before entering it into ERAS. Should we have important information to relay to applicants and you have only loaded your CV, you will receive that information, but if you are not in the system, you will miss that update.

INTERVIEW DATES

- Tuesday, November 8, 2022
- Tuesday, November 15, 2022
- Tuesday, November 29, 2022
- Tuesday, December 6, 2022

FREQUENTLY ASKED QUESTIONS (FAQ's)

Minimum USMLE Scores:

We have no minimum USMLE score requirements though more robust scores do strengthen an application.

Doctor of Osteopathic (D.O.) Applicants:

D.O. applicants are required to sumbit UMSLE scores in addition to COMLEX scores

APPLICATION PROCESS

APPLICATION PROCESS

INTERNATIONAL MEDICAL GRADUATES

Foreign medical graduates are welcome to submit their applications for review and consideration following the same application requirements as those for U.S. medical graduate applicants.

In addition:

Prior to applying for residency, one must obtain a State of California issued "Applicant Evaluation Status Letter." Instructions for this step can be found through the <u>UCSF Graduate Medical Education</u> (GME) office (requirements listed under California Medical License section).

UCSF OBGYN/RS does sponsor H1B and J-1 visas.

USMLE REQUIRMENTS

It is UCSF policy to only rank applicants who have passed both parts of USMLE Step II by the time we submit our rank list (mid February).

At UCSF, there is no minimum score requirement when submitting an application.

RESIDENT CONTRACT OVERVIEW

"In Accordance with the Terms and Conditions of the <u>NRMP</u>'s Match Participation Agreement Between Institutions and the NRMP, programs are expected to provide complete and accurate information to interviewees, including a copy of the contract (<u>click here for salary information</u>). The applicant will be expected to sign if matched to the program and all institutional policies regarding eligibility for appointment to a training position. The information must be communicated to interviewees in writing prior to the rank order list certification date. To meet this requirement, we ask that you review the information found on our web site prior to your interview with any of our training programs."

INFORMATION FOR VISITING STUDENTS

If you are Medical Student from an external program looking for the opportunity to do a rotation at UCSF, <u>click here</u>

"Only under extreme pressure can we change into that which it is in our most profound nature to become . . .

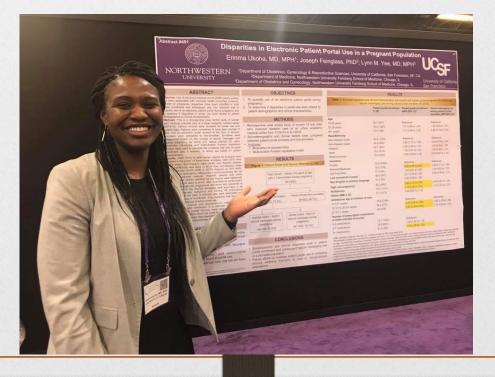

That is what people get wrong about transformation. We're not all shallow proteans, forever shifting shape. We're not science fiction. It's like when coal becomes diamond. It doesn't afterwards retain the possibility of change. Squeeze it as hard as you like, it won't turn into a rubber ball, or a Quattro Stagione pizza, or a self-portrait by Rembrandt. It's *done.*"

- Salman Rushdie

CLINICAL EXPERIENCE

CLINICAL EXPERIENCE

Our residents graduate independent and competent to perform general obstetrics and gynecology. We have a robust obstetrics and gynecology simulation program as well as having an independent hysteroscopic, laparoscopic and robotic curriculum.

UCSF believes strongly in striking that perfect balance between a high volume of cases (low exposure to teaching) and purely teaching (low number of procedures). The combined primary surgeon and teaching assistant numbers (below) represent the average clinical experience by the end of our residents' four-year program.

TRAINING SITES

UCSF Medical Center at

Mission Bay - UCSF Medical Center at Mission Bay – which opened on February 1, 2015 - is home to the Bay Area's first dedicated women's hospital, providing specialized cutting-edge treatment to women at all stages of life.

The new UCSF Betty Irene Moore Women's Hospital was designed to deliver the same cutting-edge care in a setting that supports the whole woman.

Zuckerberg San Francisco General Hospital and Trauma

Center (ZSFG) –ZSFG is nestled at the foot of Potrero Hill in the city's Mission District. While the new building opened in 2016, San Francisco General Hospital has been an essential part of San Francisco's health care system since 1872. Considered one of the finest public hospitals in the US, the General - as many refer to it - offers humanistic, costeffective and culturally competent care to an international community of patients regardless of their ability to pay. This history has had a strong impact on the hospital's culture and creed.

University of California – Women's Health Center (Mount Zion) – The UCSF

Women's Health Center is recognized internationally for its expertise in providing comprehensive, specialized care for women's health issues. We are the only nationally designated Center of Excellence in Women's Health in Northern California. We are also recognized as one of the top hospitals in the nation for gynecological care.

TRAINING SITES

Our residents rotate through several outside hospitals. These rotations add strength to our program in terms of surgical volume as well as building autonomy and confidence for the chief year. In addition, residents experience different healthcare delivery systems which is critical to understanding healthcare in our country

GLOBAL HEALTH

GLOBAL HEALTH

Global Health is a core value to the Department of Obstetrics, Gynecology, and Reproductive Sciences at UCSF. We have an amazing breadth and depth of ongoing programs dedicated to meeting the needs of women while concurrently fulfilling the mission of the department. We define global health broadly and provide a myriad of opportunities for residents who desire to affect meaningful change on an international, national and/or local level.

Abner Korn, MD

While residents have chosen to do their electives in a wide variety of clinical settings, residents have an opportunity to do a third-year rotation at Mulago Hospital/Makerere University in Kampala, Uganda. This rotation is primarily clinical and focusing on disease that is similar to the U.S but treated differently secondary to limited resources and disease that is unique to sub-Saharan Africa. Many UCSF faculty in our department and institution work at Mulago and they will be on site during the rotation. In addition, residents have the option to go to other international sites where UCSF collaborates. We have developed an extensive online pre-departure curriculum.

We have many faculty doing research and clinical work throughout the world.

UCSF Global Health Sciences (GHS) & UC Global Health Institute Health (VCGHI)

UCSF Global Health Sciences (GHS), under the leadership of Jaime Sepulveda, MD, MPH, MSc, DrSc is dedicated to improving health and reducing the burden of disease in the world's most vulnerable populations.

The UC Global Health Institute (UCGHI), part of GHS, is directed by Tom Coates, PhD, Professor Emeritus at the UCLA David Geffen School of Medicine and Founding Director of the UCLA Center for World Health, and co-directed by Craig R. Cohen, MD, MPH (professor in the UCSF Department of Obstetrics, Gynecology and Reproductive Sciences) and Ndola Prata, MD, MSc (Professor, Maternal, Child and Adolescent Health, UC Berkeley, and Director, Bixby Center for Population, Health and Sustainability).

UCGHI advances the mission of the 10-campus University of California system to improve the lives of people in California and around the world. By stimulating education, research, and partnerships, UCGHI leverages the diverse intellectual resources across the University to train the next generation of global health leaders and accelerate the discovery and implementation of transformative global health solutions.

(VCGHI) Glocal Health Fellowship

The GloCal Health Fellowship provides aspiring global health researchers with outstanding interdisciplinary education and training in innovative research designed to improve health for populations around the world. A career development fellowship sponsored by the National Institutes of Health (NIH) Fogarty International Center (FIC), this program supports awarded fellows from all 10 UC campuses as well as 20 affiliated international sites across 17 countries. UCGHI manages and supports the GloCal Health Fellowship.

This program is <u>under the direction</u> of Craig Cohen, MD, MPH (UCSF) and Steffanie Strathdee, PhD, MA (UCSD).

GLOBAL HEALTH

GLOBAL HEALTH

The Bixby Center for Global and Reproductive Health

The UCSF Bixby Center for Global Reproductive Health was formed in 1999 to address the health, social, and economic consequences of sex and reproduction through research and training in contraception, family planning, and STIs. The Bixby Center strives to develop preventive solutions to the most pressing domestic and international reproductive health problems.

FACES and ANSIRH are two of Bixby's many programs.

Family AIDS Care and Education Services

(FACES) – FACES works collaboratively with the Kenya Ministry of Health and other local partners to support and strengthen local capacity for quality HIV prevention, care, and treatment services in Nyanza province and Nairobi. FACES works to provide familycentered, comprehensive, compassionate care, and build the foundation for long-term, sustainable treatment.

FACES is a collaboration between the University of California San Francisco (UCSF) and the Kenya Medical Research Institute (KEMRI) and is funded by the U.S. President's Emergency Plan for AIDS Relief (PEPFAR)/Centers for Disease Control and Prevention (CDC) through a cooperative agreement.

University of California San Francisco

Advancing New Standards in Reproductive Health (ANSIRH)

is a collaborative research group and "think tank" at the University of California, San Francisco (UCSF). "At ANSIRH, we conduct rigorous, innovative social science research on complex and controversial issues related to reproduction. We are committed to challenging structures of inequity in order to improve reproductive wellbeing.

The Center of Expertise on Women's Health, Gender and Empowerment (WHGE), envisions a world in

which equitable gender norms lead to healthy and empowered women including UC students. The Center promotes research, education and community engagement both globally and locally to reduce gender and health inequities. This program is under the direction of <u>Ushma Upadhyay, PhD,</u> <u>MPH</u> (UCSF) and Dallas Swendeman, PhD, MPH (UCLA).

GLOCAL HEALTH

GLOCAL HEALTH

Taking care of the underserved in our community is a significant part of our mission.

<u>The Women's Options Center</u> prides itself on providing high-quality, evidencebased and comprehensive abortion and family planning services. The WOC is known for its ability and expertise in serving high-risk and medically complicated patients. We are proud to offer long-term reversible contraceptive methods that patients can choose on the day of their procedure. Many of the birth control options available to women today were evaluated in research trials at the Women's Options Center.

Based at ZSFG, <u>HIVE</u> provides multidisciplinary preconception, prenatal, gynecologic and sexual health care to people living with and affected by HIV. An initiative of HIVE, <u>Team Lily</u> is a ZSFG-based roving care team providing wraparound services to pregnant people experiencing significant barriers to engagement in clinic-based prenatal care. Team LILY serves pregnant people with housing insecurity, active substance use, and/or mental health diagnoses.

<u>The Southeast Health Center (SEHC)</u>, located in the Bayview Hunters Point district of San Francisco, is a full-service health clinic within the Community Health Network. SEHC focuses on family practice, and also provides dental and mental health services for patients and clients of all ages. The staff at SEHC includes those proficient in most languages spoken in the neighborhoods it serves and special projects are offered to meet the special needs of the population it serves.

New Generation Health Center provides confidential, youth-friendly reproductive health services for teens and young adults in San Francisco

La Clínica is one of the largest community health centers in California. It is a sophisticated provider of primary health care and other services spread across Alameda, Contra Costa, and Solano counties. They deliver health care services in a culturally and linguistically appropriate manner to most effectively address the needs of the diverse populations it serves.

OTHER UNIQUE TRAINING OPPORTUNITIES

San Francisco City Clinic - San Francisco City Clinic has been serving the Bay Area since 1911. Our mission is to improve our community's sexual health by providing free or low-cost sexual health care. We welcome everyone regardless of immigration or insurance status. We offer testing, diagnosis and treatment of sexually transmitted infections; client-centered counseling; partner services; linkage to care; family planning and emergency contraception; post- and pre-exposure prophylaxis for HIV (PEP and PrEP); and free condoms.

San Francisco County Jail - UCSF faculty and students continue to push the advances in criminal justice healthcare that Sufrin helped pioneer. Dominika Seidman MD MAS, assistant professor in the UCSF Department of Obstetrics, Gynecology and Reproductive Sciences, now advises for the "Health of Incarcerated People" elective.

"This work is particularly vital in a state like California. We have one of the nation's two largest prison systems, and decades of litigation have illustrated the close connection between correctional policies, overcrowding, and poor quality medical and mental healthcare."

<u>Centering Pregnancy Program</u> - The Centering Pregnancy Program at <u>UCSF Women's Health Center</u> takes women out of exam rooms and into groups for their prenatal care. Women complete the conventional medical history and physical exam in a doctor's office or clinic and then are invited to join a group of eight to 12 women or couples who have similar due dates.

Groups — which are formed between 12 and 16 weeks of pregnancy — meet regularly throughout the pregnancy. The groups continue to meet through the postpartum period, meeting every month for four months and then bi-weekly.

PARTNERING PROGRAMS

California Preterm Birth Initiative

<u>California Preterm Birth Initiative</u>'s mission is to eliminate racial disparities in preterm birth and improve health outcomes for babies born too soon, through research, partnerships and education grounded in community wisdom.

The Transgender CoE's goal is to improve the overall health and well-being of transgender individuals by developing and implementing programs in response to community-identified needs. The Transgender CoE actively engages a national advisory board of transgender leaders from throughout the country. We bring extensive expertise in transgender health research and best practices for gender diverse community engagement.

The Black Women's Health & Livelihood Initiative envisions a world where Black women are valued and nurtured in the same way that Black women care for others. We prioritize and amplify the voice and power of Black women, at UCSF and beyond, to achieve their optimal health and well-being.

<u>EMBRACE</u> is a clinical program developed to give Black mothers and Black pregnant people an opportunity to receive prenatal care from an intentional angle of racial consciousness.

EMBRACE asserts a deliberate and unapologetic stance around holding Black mothers, Black pregnant people and their families with a model of care where social and economic factors that affect their health can be identified and addressed.

Latinx Center of Excellence

The <u>UCSF Latinx Center of Excellence (LCOE)</u> is an innovative center established in 2018 to increase Latinx representation among physicians in academic centers by working with undergraduates in Fresno and San Francisco and with UCSF medical students, residents, and faculty.

<u>UCSF Resident and Clinical Fellow Quality Improvement</u> <u>Incentive Program</u>

The Housestaff Incentive Program (HIP) is an innovative partnership between UCSF Medical Center and the Department of Graduate Medical Education, whereby residents and fellows receive financial incentives tied to achievement of medical center quality goals. Beginning in the 2009-10 academic year, each department set one quality goal (in addition to 3 common goals across all training programs).

2021 – 2022 Housestaff-Wide Goals

Goals are determined by UCSF Medical Center and School of Medicine leadership based on clinical quality and operational priorities. They are focused on specific areas where physicians have the most impact, while at the same time being aligned with UCSF Medical Center organizational goals.

Goal #1: Patient Quality and Safety - Achieve zero harm

With an overarching goal to Achieve Zero Harm, our goal is for UCSF Health to decrease the total number of events that cause harm to patients and employees from the FY20 harm events baseline (with adjustment for volume growth) by at least 36 events.

Goal # 2: Patient Experience - Create an exceptional experience for our patients and their families

On the CAHPS and Press Ganey surveys for "MD/Provider Communication" sections, we will achieve excellence either by maintaining or increasing current scores, depending on the current baseline for the unit. **Our goal is for either Hospital or Outpatient areas to have at least 59% of units improve or maintain "High Performance."**

Goal #3: Financial Strength - Lower our costs

The focus is on operations and controllable revenue and costs. **Our goal is to achieve 7.52% budget for UCSF Health (West Bay) EBIDA Margin.** Simplified, EBIDA is a measure of our operating margin. Achieving our goal will allow UCSF Health to support our research and education priorities and care for all patients, and to continue to invest in overall strategic plans, meet necessary capital financial requirements, and meet debt obligations.

UCSF Department of OB/GYN Residency Annual Goals

As part of each institution's commitment to engaging residents in systematic enhancement of the care provided to patients, UCSF and ZSFG have Quality Improvement Incentive Programs which offer financial bonuses to residents if they meet certain self-determined as well as hospital-wide targets. Each year our residency program alternates from OB and GYN focused initiatives. For the

- 2021 22: Optimizing cesarean delivery antimicrobial prophylaxis - Improving the transition from postpartum to primary care
- 2020 21: GYN Preoperative Social Needs Screening
- 2019 20: Post-Cesarean Thromboprophylaxis on Labor and Delivery
- 2018 19: Patient Education Initiative for Disposal of Opioid Prescriptions

RESIDENT RESEARCH DAY

Resident Research Day

It is a requirement of the UCSF residency program that each resident, by the time of graduation, complete a scholarly project of publishable quality. These projects are presented during one's chief year at Resident Research Day. It is not uncommon for our residents to complete more than one project during their residency which is presented at any one of a number of professional association meetings.

Each year the Ernest W. Page Memorial Lecture is presented on Resident Research Day. The Lecture honors Dr. Page, Chairman of the Department of Obstetrics, Gynecology and Reproductive Sciences from 1956 to 1973. Dr. Page was a nationally and internationally recognized authority on preeclampsia and placental biology.

Here are the projects which were presented at the 2021 Resident Research Day:

<u>Iman Berrahou, MD</u> – Sexual and/or Gender Minority Parental Structures Among California Births Advisor: Juno Obedin-Maliver, MD, MPH, MAS

<u>Christine Blauvelt, MD</u> – Perinatal Outcomes Among Patients with Sepsis During Pregnancy Advisor: Stephanie Gaw, MD, PhD

<u>Amanda Compadre, MD</u> – Life After LACC: A Survey of Practices and Attitudes Among Gynecologic Oncologists in the Practice of Sentinel Lymph Node Mapping for Early-Stage Cervical Cancer Advisor: Jocelyn Chapman, MD, and Nicole Marjon, MD, PhD

<u>Maura Jones, MD</u> – Term Prelabor Rupture of Membranes: A Retrospective Study Comparing Immediate Labor Induction to 24 Hours of Expectant Management Advisor: Stephanie Gaw, MD, PhD

<u>Blair McNamara, MD</u> – Survival Impact of Bowel Resection at the Time of Interval Cytoreductive Surgery for Advanced Ovarian Cancer Advisor: Jocelyn Chapman, MD

<u>Carolyn Phillips, MD</u> – Obstetric Outcomes of Healthcare Professionals Advisor: Stephanie Gaw, MD, PhD and Vasiliki Tatsis, MD

<u>Brett Stark, MD, MPH</u> – Using the Female Sexual Function Index (FSFI) to Describe Sexual Dysfunction in Sexual and/or Gender Minority (SGM) People with Vaginas Advisors: Juno Obedin-Maliver, MD, MPH, MAS

<u>Nicole Tantoco, MD, MPH</u> – Progression to Nonimmune Hydrops Fetalis in Fetuses with Increased Nuchal Translucency Advisor: Anne H. Mardy, MD, Mary E. Norton, MD, and Teresa N. Sparks, MD

<u>Yolanda Tinajero, MD</u> – Immediate Postpartum Breastfeeding Following Pregnancy with Cardiac Disease Advisor: Nasim Sobhani, MD

Complex Family Planning Fellowship

The Complex Family Planning Fellowship The University of California, San Francisco (UCSF), Complex Family Planning Fellowship began in 1991 as the first Fellowship site. It is a 2-year fellowship program newly accredited by the Accreditation Council for Graduate Medical Education (ACGME). Primarily based at Zuckerberg San Francisco General (ZSFG - the city and county hospital of San Francisco), UCSF's unique program allows fellows to participate in a fully integrated clinical and research environment. Fellows work directly with leaders in the field of family planning, conducting clinical trials, epidemiological studies, qualitative research, policy evaluation, and international training and research. Fellows provide clinical care at one of the largest second-trimester outpatient clinics in the country. In addition to all ob/gyn subspecialty fellowships, UCSF offers advocacy training.

Program Directors: Director - Jen Kerns, MD, MS, MPH, Associate Director - Biftu Mengesha, MD, MAS

Current Fellows:

Crystal-Ornelas, Lara, MD - Mount Sinai (Medical School), Santa Rosa Family Medicine (Residency) (Graduating in 2022)

Jeanlus, Ashley, MD - Geisinger Commonwealth School of Medicine (GCSOM) (Medical School), Jamaica Hospital Medical Center (intern year), University at Buffalo(Residency)

Kinsey, Kelly Elizabeth Treviño (Elizabeth) MD - Oregon Health and Sciences University (Medical School), Mount Sinai West/Morningside (Residency) (Starting in 2022)

Urbina, Josephine (Josie), MD - Universidad Autonoma de Guadalajara (Medical School), Jersey Shore Medical Center (Residency) (Graduating in 2022)

FELLOWSHIP PROGRAMS

Maternal Fetal Medicine (MFM) Fellowship

<u>The Maternal Fetal Medicine Fellowship</u> occurs at UCSF. The 3-year fellowship includes half-time clinical training and halftime pursuing a research project. There are extensive opportunities in clinical research (outcomes research, epidemiology, biostatics), and also for basic research in molecular mechanisms, animal physiology, immunology, and genetics.

Program Director: Juan M. González, MD, MS, PhD / Assoc Program Director: Marya Zlatnik, MD, MMS

Current Fellows:

Basilio, Emilia, MD, MPH - UC, Davis (Medical School), UCSF (Residency)

Blauvelt, Christine, MD - University of Pennsylvania (Medical School), UCSF (Residency) (Starting in 2022)

Cassidy, Arianna, MD - UCSF (Medical School), UCSF (Residency),

Gonzalez. Veronica, MD – UCSF (Medical School), UT Austin/Dell Medical School (Residency) (Graduating in 2022)

Hernandez Lopez, Adrian, MD – UCLA (Medical School), Kaiser Permanente Los Angeles Medical Center (Residency) (Starting in 2022)

Ranjit, Anju, MD, MPH - Nepal Medical College (Medical School), Howard University (Residency)

Robles, Diana, MD – Stanford (Medical School), UCSF (Residency) (Graduating in 2022)

Wen, Timothy, MD – USC / Keck (Medical School), Columbia (Residency)

Yin, Ophelia, MD – Johns Hopkins (Medical School), UCLA (Residency) (Starting in 2022)

Maternal Fetal Medicine (MFM) / Genetics

Shear, Matthew, MD – University of Vermont (Medical School), Beth Israel Deaconess Medical Center (Residency)

Swanson, Kathleen, MD - Northwestern University(Medical School), Northwestern University (Residency) (Graduating in 2022)

FELLOWSHIP PROGRAMS

UCSF / KPSF Gynecologic Oncology Fellowship Program

<u>The UCSF / KPSF joint fellowship program</u> in Gynecologic Oncology is a 3-year program newly accredited by ACGME. Through the provision of ambulatory care, surgical management, systemic cytotoxic treatments including chemotherapy and other targeted agents, as well as palliative care, to women with gynecologic malignancies, our fellows will acquire clinical skills, knowledge and attitudes essential to the practice of gynecologic oncology. Our graduates will be able to apply sound clinical judgment and skill, interpret and apply relevant evidence, actively solicit patient preference and participation in decisionmaking, and serve as subspecialty consultants to our medical colleagues.

Program Director: <u>Stephanie Ueda, MD, FACOG</u> (UCSF); Associate Program Director – <u>Lee-may Chen, MD, FACS, FACOG</u> (UCSF); <u>Ramey Littell, MD</u> (KPSF Site Director)

Current Fellows :

Jang, Allyson (Ally), MD - Penn State (Medical School), UC Davis (Residency)

Kay, Allison, MD – Brown (Medical School), University Of Washington (Residency)

Marjon, Niki (Nicole), MD, PhD - University of New Mexico (Medical School), Stanford (Residency) (Graduating in 2022)

Mcgough-Maduena, Alison Sinclair, MD - University of New Mexico (Medical School), University of New Mexico (Residency) (Starting in 2022)

KPEB / UCSF Female Pelvic Medicine & Reconstructive Surgery Fellowship

Kaiser Permanente East Bay and University of California-San Francisco Medical Center have partnered to create our ACGMEaccredited, integrated multi-disciplinary fellowship training program in <u>Female Pelvic Medicine & Reconstructive Surgery</u>.

The fellowship is a three-year training program open to applicants after successful completion of residency training in Obstetrics & Gynecology or Urology. Two years are dedicated to clinical and surgical mastery of diagnosis and treatment of pelvic floor disorders, and the equivalent of one year (12 non-consecutive months) is dedicated to research. Our fellowship program balances surgical cases, clinical care, scholarship, and research, as we believe learning to balance these activities during training is crucial to continued success as leaders in medicine.

Faculty:

Olga Ramm, MD - Fellowship Program Director Donna Deng, MD - Associate Fellowship Director Rebecca Margulies, MD - Kaiser - East Bay / Assistant Clinical Professor - UCSF Anne M. Suskind, MD, MS, FACS - UCSF Abner Korn, MD - UCSF Alexander A. Berger, MD, MPH - UCSF

Current Fellows :

Alagh, Amy, MD - UC San Diego (Medical School), UCSF Fresno (Residency)

Saad, Jaber, MD - Oakland University (Medical School), Oakland University (Residency) (Starting in 2022)

Velasco, Victor, MD – UCLA/Geffen (Medical School), LA County DHS (Residency) (Graduating in 2022)

Wong, Jennifer, MD - University of Hawaii (Medical School), University of Hawaii (Residency)

FELLOWSHIP PROGRAMS

Reproductive Endocrinology And Infertility (REI) Fellowship

The REI Fellowship is a three-year training designed to include clinical experience in reproductive endocrinology, including pediatric and adult endocrinology, infertility and advanced reproductive technology, formal coursework and seminars, and an investigative program in reproductive medicine. By the conclusion of the fellowship, the fellow should be prepared to function as an independent investigator in academic reproductive endocrinology and as a well-trained clinical reproductive endocrinologist.

Program Director: Marcelle Cedars, MD

Current Fellows :

Christ, Jacob, MD – Case Western (Medical School), University of Washington (Residency) (Starting in 2022)

Hariton, Eduardo, MD, MBA – Harvard (Medical School), Brigham and Women's Hospital, Harvard (Residency) (Graduating in 2022)

Huang, David, MD - Brown (Medical School), UCSF (Residency)

Morris, Jerrine, MD, MPH – Virginia Commonwealth (Medical School), Emory (Residency) (Graduating in 2022)

Shapiro Eger, Maren, MD - University of Pennsylvania (Medical School), Massachusetts General Hospital (Residency)

Stark, Brett, MD – Georgetown (Medical School), UCSF (Residency) (Starting in 2022)

Tolani, Alisha, MD - Stanford (Medical School), Stanford (Residency)

Wang, Ange, MD - Stanford (Medical School), Stanford (Residency)

FELLOWSHIP PROGRAMS

UCSF Preterm Birth Post-doctoral Fellowship Program

The <u>UCSF Preterm Birth Initiative</u> (PTBi) is a multi-year, transdisciplinary and multi-sector research effort aimed at reducing the burden of prematurity. The PTBi applies scientific, clinical, and community expertise to address prematurity, the leading cause of childhood death worldwide. We have two parallel arms that are geographically focused in California and East Africa. In California, our goals are to decrease the incidence of preterm birth, which disproportionally affects African American women of all socioeconomic backgrounds and poor women of all races/ethnicities, and to improve outcomes for babies born preterm. In East Africa, we aim to reduce neonatal mortality among preterm infants by improving quality of care during the antenatal, intrapartum and immediate postnatal periods in select regions of Western Kenya, Eastern Uganda, and Rwanda.

Program Directors: Miriam Kuppermann, PhD, MPH and Jonathan Fuchs, MD, MPH

Current Fellows :

Bell, April, PhD, MPH - Indiana University (MPH), Indiana University School of Public Health (PhD in Epidemiology)

Davis, Brigette, PhD – Harvard (PhD), Yale (MPH)

Keeton, Victoria F., PhD(c), RN, CPNP-PC, CNS – UC Davis (PhD). UCSF (MS / Nursing)

Omowale, Serwaa S. PhD, MSW – University of Pittsburgh (MSW), University of Pittsburgh (PhD)

Rackaityte, Elze, PhD – UCSF (PhD)

Tessera, Ribka Amsalu, MD, MSc, MAS – University of Oxford (Medical Studies)

UCSF / San Francisco VA Women's Health Fellowship

The Health Issues of <u>Women Veterans Fellowship Program</u> provides two years of post residency, post-doctoral research, education, and clinical learning opportunities to eligible physicians and associated health professionals. Fellows spend approximately 75 percent of their time in research and education and 25 percent in clinical care at selected VA sites. Mentors of national stature provide guidance to fellows in rich learning environments. Graduates are expected to be role models in leading, developing, conducting, and evaluating innovative research, education, and clinical care in health issues pertaining to women veterans.

Program Co-Directors: : Karla Kerlikowske, MD Professor of Medicine, Sabra Inslicht, PhD, and George Sawaya, MD

FELLOWSHIP PROGRAMS

UCSF Kaiser Hospitalist Fellowship

The UCSF Department of Obstetrics and Gynecology in partnership with Kaiser Permanente, Walnut Creek is pleased to announce an <u>OB/GYN Hospitalist Fellowship Program</u>. This one-year program is designed to provide comprehensive and rigorous training through mentorship as well as clinical education and a rich exposure to healthcare systems of quality and improvement. Our goal is to develop a cohort of academic and clinical leaders who will then contribute to the growing field of OB/GYN Hospitalists.

Responsibilities include patient care at Kaiser Permanente, Walnut Creek and UCSF, teaching and supervising students and residents, and development and implementation of protocols, tools, and/or clinical pathways that result in enhanced patient safety and quality care in the hospital. Fellows will demonstrate proficiency in hospitalist competencies after completion of this program. All fellows will be offered a housing stipend to contribute to the additional living expenses attributed to the Bay Area.

Program Directors: Vasiliki Tatsis MD, MS, MBA (UCSF), Emily Newfield MD, FACOG (Kaiser Permanente – Walnut Creek Site Director)

Current Fellows :

Stanley, Elizabeth, MD - Medical University of South Carolina (Medical School), New Hanover Regional Medical Center (Residency) (Starting in 2022

Yoder, Katelyn, MD – Queen Margaret University (Medical School), Tulane (Residency) (Graduating in 2022)

UCSF General Obstetrics & Gynecology Research Fellowship

The University of California, San Francisco (UCSF) Department of Obstetrics, Gynecology, and Reproductive Sciences offers a two-year fellowship to train and prepare general obstetrician gynecologists to pursue a <u>clinical research career in</u> <u>an academic department</u>.

Clinical investigation includes a broad range of content and methods with human subjects such as patient-oriented, translational, epidemiologic, behavioral, outcomes, implementation or health services research. Any research topic within the scope of practice of general obstetrician gynecologists is appropriate for the fellowship training.

At the end of training, fellows will have a strong foundation in the design and conduct of clinical research with the necessary mentorship and resources to advance their career. Fellows will be well positioned to obtain extra-mural funding to launch an academic career with a focus on clinical investigation.

Program Director: Vanessa Jacoby, MD, MAS

Current Fellows :

Allen, Antoinette, MD – UCLA (Medical School), University of Pennsylvania (Residency) (Starting in 2022)

Grubman, Jessica, MD- USC/Keck (Medical School), UT Southwestern (Residency)

FELLOWSHIP PROGRAMS

The HEAL Initiative (Health, Equity, Action & Leadership)

Front line health professionals are natural advocates of poor patients and have a meaningful role in achieving health equity. Much of our training in our health education schools does not give us the expertise to serve underserved populations. The HEAL community aims to mold ourselves personally and professionally to embody the values of service and solidarity with underserved patients. A transnational and inter-professional community of like-minded health professionals allows us to create the space to learn from each other to better serve marginalized populations.

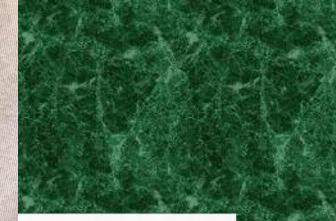

The HEAL Initiative works in Native American reservations, prisons, and the poorest villages on our planet. We pair dedicated U.S. providers with local health professionals who are already working in these communities. HEAL fellows work together on the frontline for two years. They develop skills essential to global health delivery through immersive training, an on-line Master's in Public Health at UC Berkeley, and intensive mentorship.

COMMUNITY SERVICE AND ADVOCACY

Jn. Molmell Monts Obstetrics & Gynecol

Everybody can be great. Because anybody can serve. You don't have to have a college degree to serve. You don't have to make your subject and verb agree to serve. You don't have to know about Plato and Aristotle... (or) Einstein's Theory of Relativity ... (or) the Second Theory of Thermodynamics in physics to serve. You only need a heart full of grace. A soul generated by love.

- Martin Luther King, Jr.

COMMUNITY SERVICE AND ADVOCACY

The plain fact is that the planet does not need more successful people. But it does desperately need more peacemakers, healers, restorers, storytellers, and lovers of every kind. It needs people who live well in their places. It needs people of moral courage willing to join the fight to make the world habitable and humane. And these qualities have little to do with success as we have defined it."

-- David W. Orr

We have to get smart and understand the vast majority of these undocumented immigrants are following the law, working hard, raising their children, paying taxes – and we have to provide a pathway for them. ... Sanctuary cities evolved around the idea that we also don't want to deny access to public safety, public health, public education for anyone who is living ... in our community."

-- Vice President Kamala Harris (Then CA Attorney General)

The president's executive order is not only unconstitutional, it's un-American. This country was founded on the principle that the federal government cannot force state and local governments to do its job for it, like carrying out immigration policy. I am defending that bedrock American principle today.

San Francisco is safer when all people, including undocumented immigrants, feel safe reporting crimes. San Francisco is healthier when all residents, including undocumented immigrants, access public health programs. And San Francisco is economically and socially stronger when all children, including undocumented immigrants, attend school."

-- San Francisco City Attorney Dennis Herrera

COMMUNITY SERVICE AND ADVOCACY

"The history of men's opposition to women's emancipation is more interesting perhaps than the story of that emancipation itself." — Virginia Woolf

The OB/GYN resident classes commit to community service-based projects throughout their residency. As a core value of the residency training program, community advocacy and service allow the residents an opportunity to participate in and give back to the diverse communities of the San Francisco bay area.

Taking time out to pose with Senator Tammy Duckworth , Drs. Palacios-Helgeson and Maykin descended on Washington, D.C. for ACOG's 2017 Congressional Leadership Conference (CLC) and lobby Members of Congress during the Capitol Hill Lobby Day

Each year, the 2nd year class joins Dr. Rebecca Jackson for ACOG Lobby day in Sacramento to meet with legislators and policy makers. This opportunity allows residents to gain a better sense of the policy making system, advocate for the people of California and to serve as expert resources on pending legislation to the policy makers of the state.

TEAM MENSTRUAL CYCLES is a

department-wide team of cyclists who participate in the annual Waves to Wine ride to raise money for Multiple Sclerosis research.

COMMUNITY SERVICE AND ADVOCACY

Residents have also taken advantage of the opportunity to serve as volunteer preceptors at the <u>UCSF</u> <u>Homeless Clinic</u>. The clinic serves a diverse population of homeless and transiently housed individuals at a large shelter in the south of Market neighborhood.

Coordinated and staffed by medical student volunteers, the clinic provides primary care, selected specialty care, and referrals. During bimonthly Women's Clinics, the resident volunteers serve as medical supervisor, teacher, and mentor for the medical students. We are honored to serve as preceptors as part of our ongoing commitment to providing high quality care for San Francisco's underserved population.

In honor of Dia de Los Muertos, our residents created a very powerful and important altar to honor women who have died in childbirth across the globe. The altar entitled "A las madres que mueren al parir" was one of 9 large altars in this celebration of culture in the Mission. The altar was inspired by a similar homage to women in Mexico City and was displayed at the San Francisco Alamo Draft House.

<u>The U'ilani Fund</u> - The U'ilani Fund is a non-profit organization committed to providing support for complementary treatments for women with breast cancer in Santa Cruz, the San Francisco Bay Area, and Hawaii. Faculty and residents participate in their annual bike ride in the Santa Cruz area to raise awareness and funding.

> "If I can't dance to it, it's not my revolution." – Emma Goldman

SAN FRANCISCO

"It is an odd thing, but every one who disappears is said to be seen at San Francisco. It must be a delightful city and possess all the attractions of the next world." – Oscar Wilde "The Picture of Dorian Gray"

"What fetched me instantly (and thousands of other newcomers with me) was the subtle but unmistakable sense of escape from the United States." - H.L. Mencken

"Your city is remarkable not only for its beauty. It is also, of all the cities in the United States, the one whose name, the world over, conjures up the most visions and more than any other, incites one to dream."

- Georges Pompidou

"San Francisco is a mad city inhabited for the most part by perfectly insane people whose women are of remarkable beauty" - Rudyard Kipling

"One day if I do go to heaven I'll look around and say, 'It ain't bad, but it ain't San Francisco." - Herb Caen

"There's surely lots to sneer at, San Francisco and the Bay being pretty much the epicenter of so many of my most cherished aversions: political correctness, veganism, rich hippies, sanctimoniousness about food, food fetishism, animal rights terrorists, gastro-dogma, and loud locavores who actually get their produce flown in from Chino Farms in San Diego. But at this point, I bore even myself railing against the above...I guess it's like any love that's true--sooner or later you learn to accept the good, bad and silly all together. It's all part of the package when you know, without any question, that you want the package. It doesn't even matter if one's love is returned."
